

CircuitMap - board handover

DB-G1

Electrical cupboard, Ground floor, Example House

Issued: 2026-09-21T10:45:15.393Z

Issued by: Example Reviewer

Record review: verified

Circuits: 3 | Evidence files: 1

Reviewed by: Example Reviewer

Review date: 2026-09-21T10:45:13.252Z

Review note: Compared all three imported circuits with the fictional Example House source schedule and checked the board details and floor plan. Demonstration of records review only; no physical inspection or electrical certification is represented.

Scope: this board and its circuits, linked room names, current floor plan, and board/circuit photographs. Other boards, building documents, system certificates and the wider portfolio are not included in this pack.

This is a record handover, not an electrical safety certificate or permission to work. Confirm conditions on site and use the appropriate competent-person inspection and safe-isolation procedures.

The issued ZIP is a frozen copy. Later edits do not update it.

SHA-256 checksums for every enclosed file are listed in manifest.json.
